

PRIYANK SOLANKI

Meerut, Uttar Pradesh

Game Developer | AI/ML Engineer

+91 9897997553 | priyanksolanki9853@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#) | [Leetcode](#)

EDUCATION

Vellore Institute of Technology, Bhopal <i>B.Tech - Computer Science and Engineering (Gaming Technology) - CGPA - 9.00</i>	2023 – 2027
Delhi Public School, Bulandshahr <i>Class XII - 94%</i>	2021 – 2022
Nirmala Convent School, Bulandshahr <i>Class X - 90.4%</i>	2019 – 2020

EXPERIENCE

SPEAR Grant 2025 <i>Augmented Reality Developer Intern</i>	Sep 2025 – Present
- Engineering an AR-based interactive vocabulary learning system under a faculty-funded research initiative, building and optimizing Unity modules with real-time object tracking and gesture-based interactions to deliver intuitive, gamified learning experiences. - Modeling, texturing, and rigging performance-optimized 3D assets and environments in Blender, translating pedagogical requirements into engaging, real-time AR-ready visuals across devices.	

OPEN-SOURCE CONTRIBUTIONS

Open Source Contributor <i>GSSOC'26, NSOC'26, SSOC'26</i> React, FastAPI, jsPDF	Apr 2026 – Jul 2026
- Developing an end-to-end PDF export pipeline for DoubtDesk with Clerk authentication and RBAC, giving instructors secure access to classroom doubt metadata. - Authoring optimized multi-stage Dockerfiles for a FastAPI ML microservice (Sahidawa India), cutting image size to 244MB and build time to 7 seconds to speed up CI/CD.	

PROJECTS

Nanobots Enigma: The Techno Dungeon <i>Unity 6, C#, Blender</i> GitHub Live	Oct 2025
- Programmed a comprehensive 3D Action RPG featuring custom finite state machine enemy AI behaviors, hitboxes, and active combat systems. - Designed and texture-mapped specialized open-world models using Blender, improving layout memory allocation through structural mesh optimizations.	
Nyaya AI: Legal Intelligence Platform <i>FastAPI, RAG, Llama 3, Pinecone</i> GitHub Live	Dec 2025
- Architected a full-stack legal AI platform using RAG to interpret complex statutory text with a verified 98% retrieval accuracy score. - Optimized vector search indexing via Pinecone and HuggingFace embeddings to query over 15,000 structural precedents in sub-second time.	
Sharp Shooter: 3D Sci-Fi FPS <i>Unity 6, C#</i> GitHub Live	Sep 2025
- Developed a fast-paced 3D first-person shooter featuring intelligent enemy AI, including flying drones and ranged ground shooters that dynamically track and engage the player. - Implemented a multi-weapon combat system with real-time health/shield HUD, ammo tracking, and complete win/loss game-state logic with restart functionality.	

TECHNICAL SKILLS

Languages: Python, C#, C++, JavaScript, SQL
AI/ML: GenAI, RAG, LLMs (Llama 3, OpenAI), NumPy, Pandas
Game Development: Unity Engine, Blender 3D, Game Design, AR/VR, UV Mapping, FPS Mechanics
Web Development: React.js, FastAPI, Flask, REST APIs, HTML5, CSS3
Cloud & DevOps: AWS, Microsoft Azure, Docker, Git/GitHub, CI/CD

CERTIFICATIONS

Microsoft Certified: Azure Data Fundamentals	July 2025
Udemy: Complete C# Unity Game Developer 3D	May 2025
