

PRIYANK SOLANKI

Meerut, Uttar Pradesh

Game Developer | AI/ML Engineer

+91 9897997553 | Gmail | LinkedIn | Github | Portfolio | Leetcode

SUMMARY

Performance-driven Computer Science Engineering undergraduate specializing in Gaming Technology, alongside the convergence of Artificial Intelligence, Augmented Reality, and full-stack web architectures. Expert in deploying Generative AI pipelines (RAG), computer vision, and immersive 3D graphics via Unity and Blender. Proven track record of spearheading funded technical research, uniquely bridging the gap between intelligent backend systems and intuitive digital experiences.

EDUCATION

Vellore Institute of Technology, Bhopal

2023 – 2027

B.Tech - Computer Science and Engineering - **CGPA - 8.98**

Bhopal, Madhya Pradesh

EXPERIENCE

SPEAR Grant 2025 | Augmented Reality Developer Intern

Sep 2025 – Present

- Selected as 1 of 15 students for a funded project developing an AR-based interactive vocabulary learning system.
- Developing immersive modules in Unity Engine and designing 3D assets in Blender with real-time tracking and gamified mechanics.

GirlScript Summer of Code (GSSoC 2026) | Open Source Contributor (AI & Agents)

May 2026 – Present

- Contributing to open-source initiatives focused on AI architectures and autonomous generative agents.
- Collaborating with international maintainers to optimize backend logic and engineer modular Git components.

PROJECTS

Nyaya AI: Legal Intelligence Platform  | FastAPI, RAG, Llama 3, Pinecone

Dec 2025

- Architected a full-stack legal AI platform using RAG to interpret complex statutory text with a verified 98% retrieval accuracy score.
- Optimized vector search indexing via Pinecone and HuggingFace embeddings to query over 15,000 structural precedents in sub-second time.

SafeRoute AI: Accident-Risk Route Advisor  | Python, OpenCV, ML

Nov 2025

- Engineered a spatial navigation routing advisor leveraging OpenCV and predictive Machine Learning algorithms to analyze historical accident blackspots.
- Calculated dynamic infrastructure risk scores to automatically map alternative, high-safety paths via geographic coordinate arrays.

Nanobots Enigma: The Techno Dungeon  | Unity 6, C#, Blender

Oct 2025

- Programmed a comprehensive 3D Action RPG featuring custom finite state machine enemy AI behaviors, hitboxes, and active combat systems.
- Designed and texture-mapped specialized open-world models using Blender, improving layout memory allocation through structural mesh optimizations.

TECHNICAL SKILLS

Languages: Python, C#, C++, JavaScript, Java, SQL, HTML5, CSS3

AI, ML & Agents: GenAI, RAG, Autonomous Agents, ML, CV, OpenAI/Llama 3, Pinecone, OpenCV

Game Development : Unity Engine, Blender 3D, Game Design, UV Mapping, AR/VR

Web & Databases: FastAPI, Flask, React.js, Supabase (PostgreSQL), Leaflet.js, REST APIs, DBMS

Cloud & Developer Tools: AWS, Microsoft Azure, Git/GitHub, VS Code, Canva, Hugging Face

CERTIFICATIONS

- SmartBridge Google Cloud Generative AI July 2025
- Microsoft Certified: Azure Data Fundamentals July 2025
- Udemy: Complete C# Unity Game Developer 3D May 2025
- Coursera: Making Your First VR Game Dec 2025
