SUMMARY

Performance-driven Computer Science Engineering undergraduate specializing in Gaming Technology, alongside the convergence of Artificial Intelligence, Augmented Reality, and full-stack web architectures. Expert in deploying Generative AI pipelines (RAG), computer vision, and immersive 3D graphics via Unity and Blender. Proven track record of spearheading funded technical research, uniquely bridging the gap between intelligent backend systems and intuitive digital experiences.

EDUCATION

Vellore Institute of Technology, Bhopal

2023 – 2027

B.Tech - Computer Science and Engineering - CGPA - 8.98

Bhopal, Madhya Pradesh

EXPERIENCE

SPEAR Grant 2025 | Augmented Reality Developer Intern

Sep 2025 – Present

- Selected as 1 of 15 students for a funded project developing an AR-based interactive vocabulary learning system.
- Developing immersive modules in Unity Engine and designing 3D assets in Blender with real-time tracking and gamified mechanics.

GirlScript Summer of Code (GSSoC 2026) | Open Source Contributor (AI & Agents)

May 2026 – Present

- Contributing to open-source initiatives focused on AI architectures and autonomous generative agents.
- Collaborating with international maintainers to optimize backend logic and engineer modular Git components.

PROJECTS

Nyaya.ai: Legal Intelligence Platform | FastAPI, RAG, Llama 3, Pinecone

Dec 2025

- Developed a full-stack legal AI companion using Retrieval-Augmented Generation (RAG) to interpret the Bhartiya Nyaya Sanhita (BNS) with 98% accuracy.
- Architected a vector search pipeline using Pinecone and HuggingFace embeddings to query 15,000+ precedents in sub-second time.
- Integrated Llama 3.3 (via Groq) to build an AI Verdict Predictor and Automated Document Drafter for affidavits and agreements.

SafeRoute AI: Accident-Risk Route Advisor | Python, OpenCV, ML

Nov 2025

- Developed an intelligent route advisory system using Python and Computer Vision to analyze road data and identify high-risk zones.
- Implemented Machine Learning algorithms to process historical accident records, calculating dynamic risk scores to suggest alternative low-risk paths.

Nanobots Enigma: The Techno Dungeon | Unity 6, C#, Blender

Oct 2025

- Developed a 3D Action RPG with fast-paced combat, melee/ranged enemy AI, and a fully animated interactive 3D main menu.
- Designed a stylized open world using Blender, optimizing custom 3D assets and implementing high-fidelity lighting and post-processing.

TECHNICAL SKILLS

Languages: Python, C#, C++, JavaScript, Java, SQL, HTML5, CSS3

Technologies/Frameworks: FastAPI, React.js, OpenCV, Supabase, RAG, GenAI, Pinecone

Developer Tools: Unity Engine, Blender, Git/GitHub, VS Code, Canva, DBMS

CERTIFICATIONS

- SmartBridge Google Cloud Generative AI
- Microsoft Certified: Azure Data Fundamentals
- Udemy: Complete C# Unity Game Developer 3D
- Coursera: Making Your First VR Game

DECLARATION : I hereby declare that the details provided above are true and correct to the best of my knowledge.
